Replacement Digital EFI control module

SHARK BITE!

CDI Electronics now offers a series of NEW replacement Digital Electronic Fuel Injection modules. Introducing the 314-9849 Digital EFI designed for the factory racing engines manufactured by Mercury Marine. No modifications are necessary for using this replacement compatible EFI module. Improved design provides you a hassle-free product.

- Proven 'Digital' design from the leaders in outboard ignition technology
- Economically priced alternative for the customer
- New case and components remedy the 'core required' issue
- Coated metal housing resists the effects of corrosion
- All critical component circuitry is waterproof sealed for protection
